

# Accelerate Digital Transformation with Azure DevOps and GitHub

Teerachai Laothong  
and Sakul Jaruthanaset  
Digital Thailand Club

# The Challenge

50% of Fortune 500 in 2000 now **replaced** by organizations that **use technology** to deliver customer value **faster, better, and cheaper**

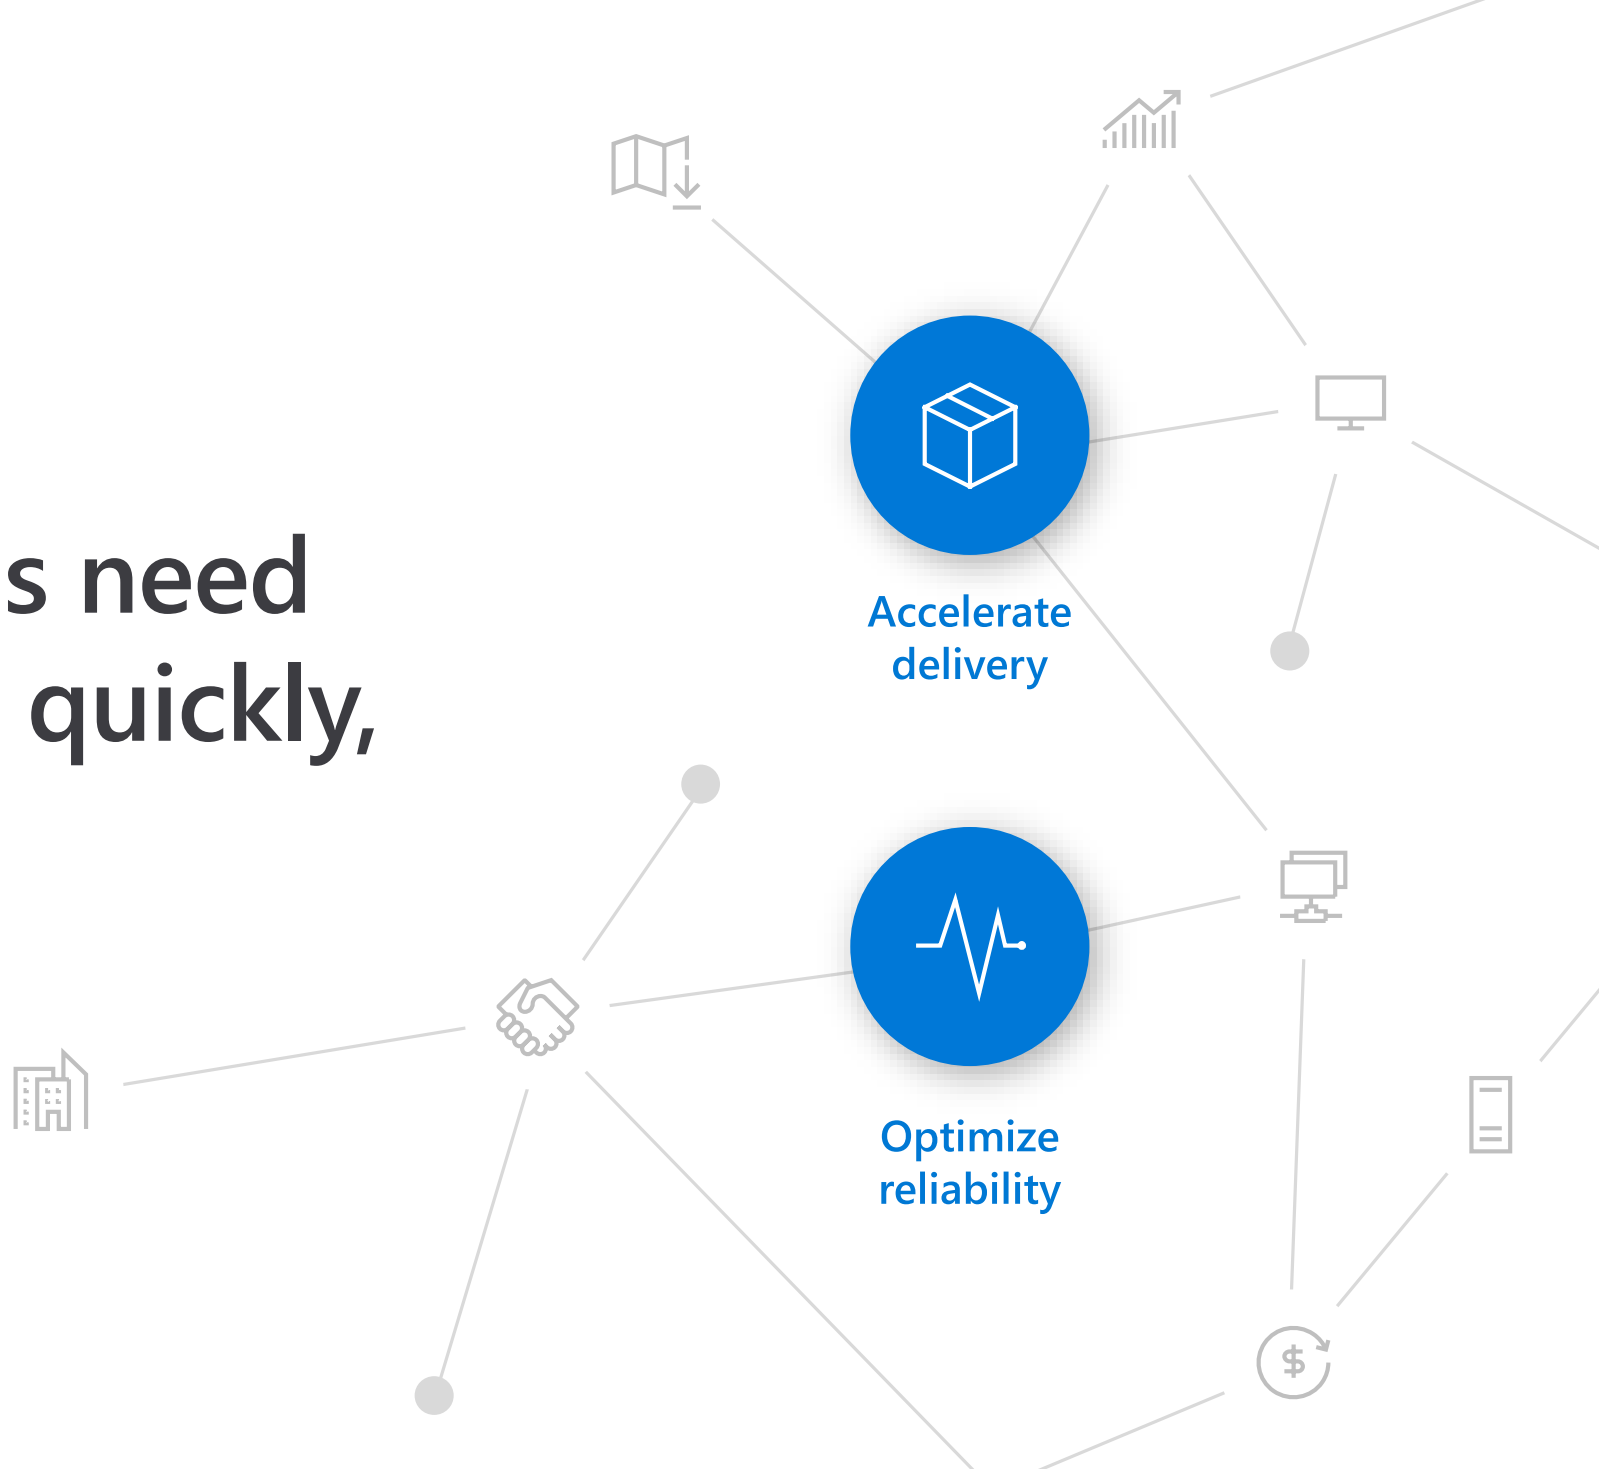

The Fortune 500 of today face the same challenge tomorrow

**Innosight**

Corporate Longevity: Turbulence Ahead for Large Organizations

Product innovations need  
to reach customers quickly,  
and stay available

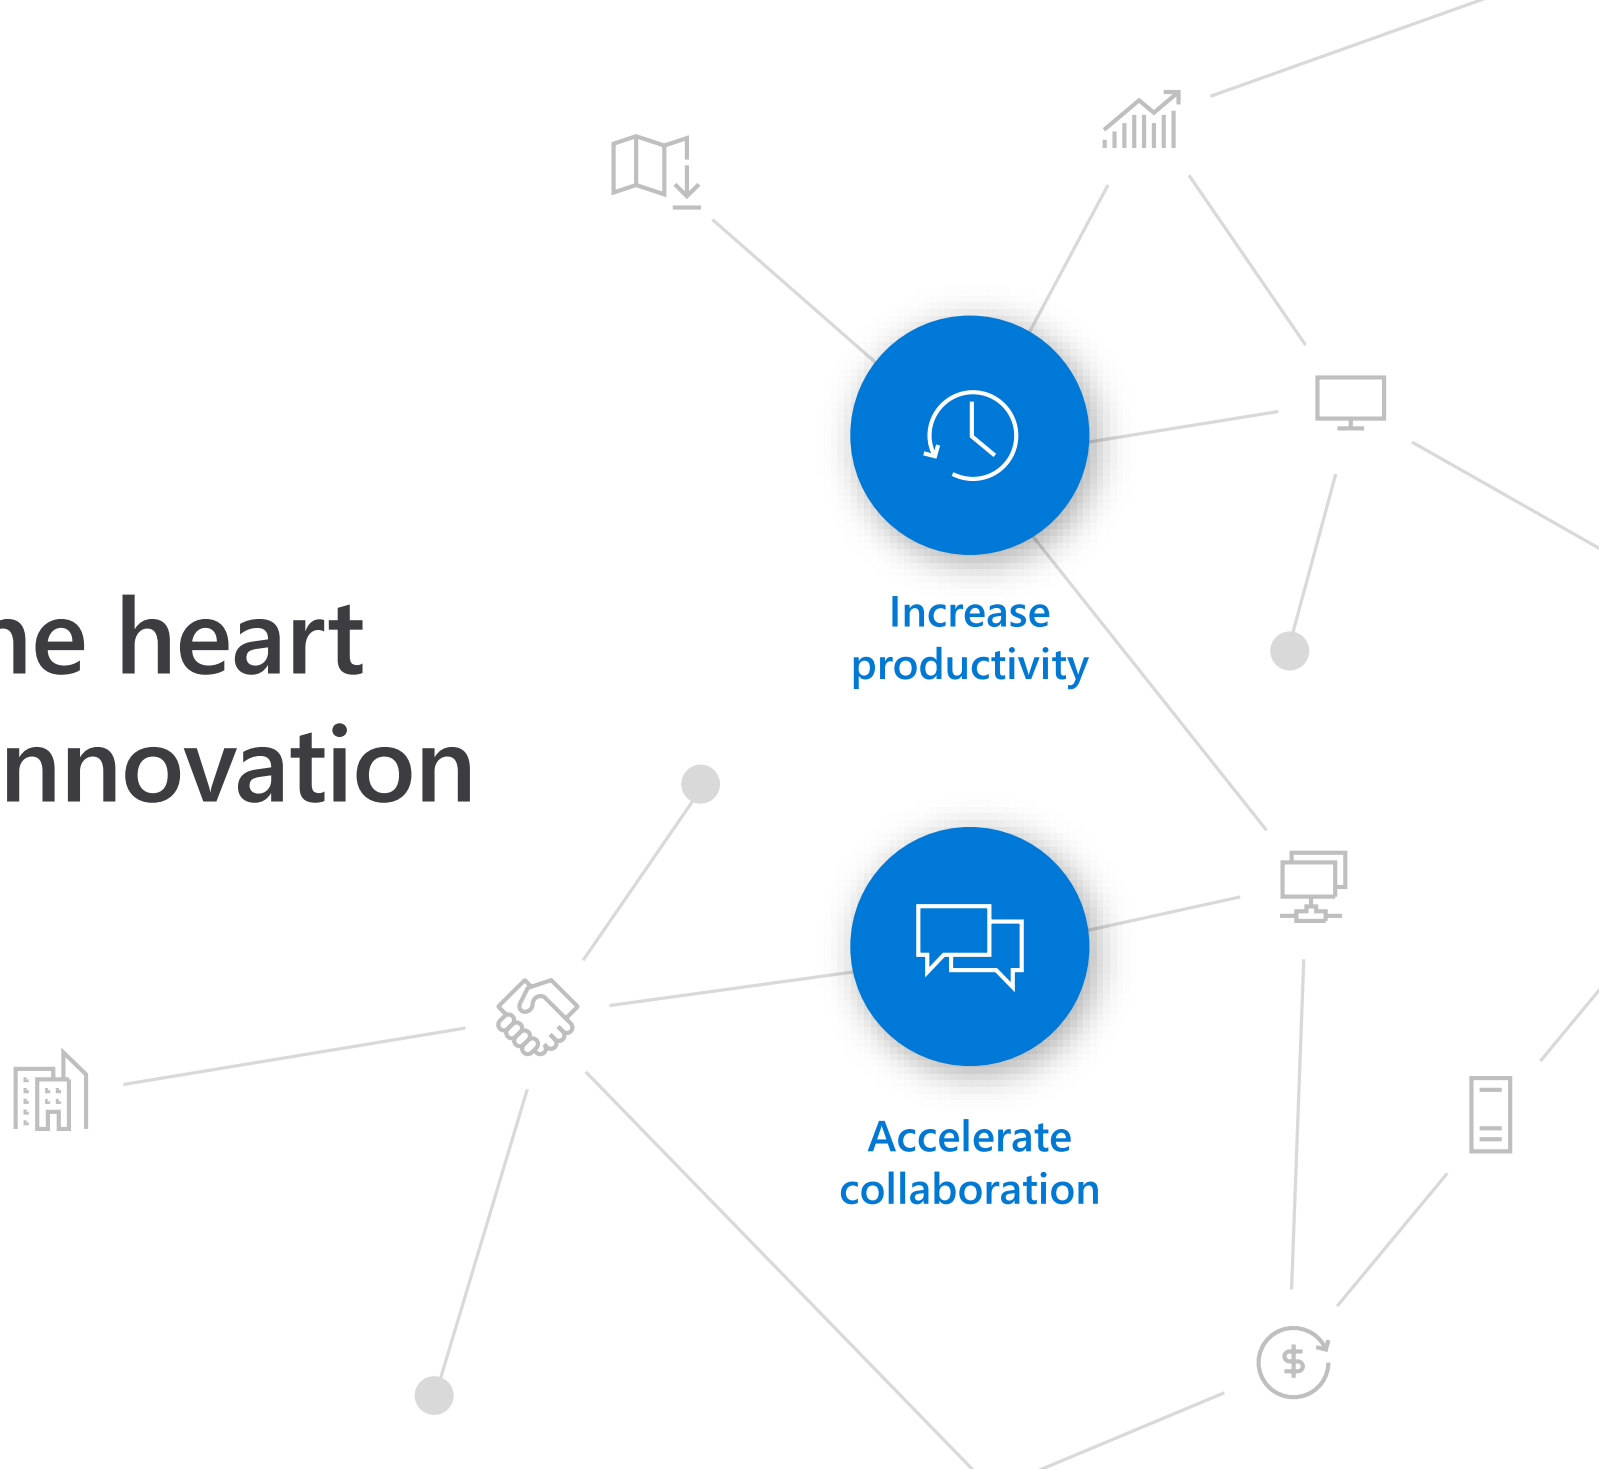

# Software delivery paradox

Speed vs. control impedes innovation

# Developers are at the heart of your company's innovation

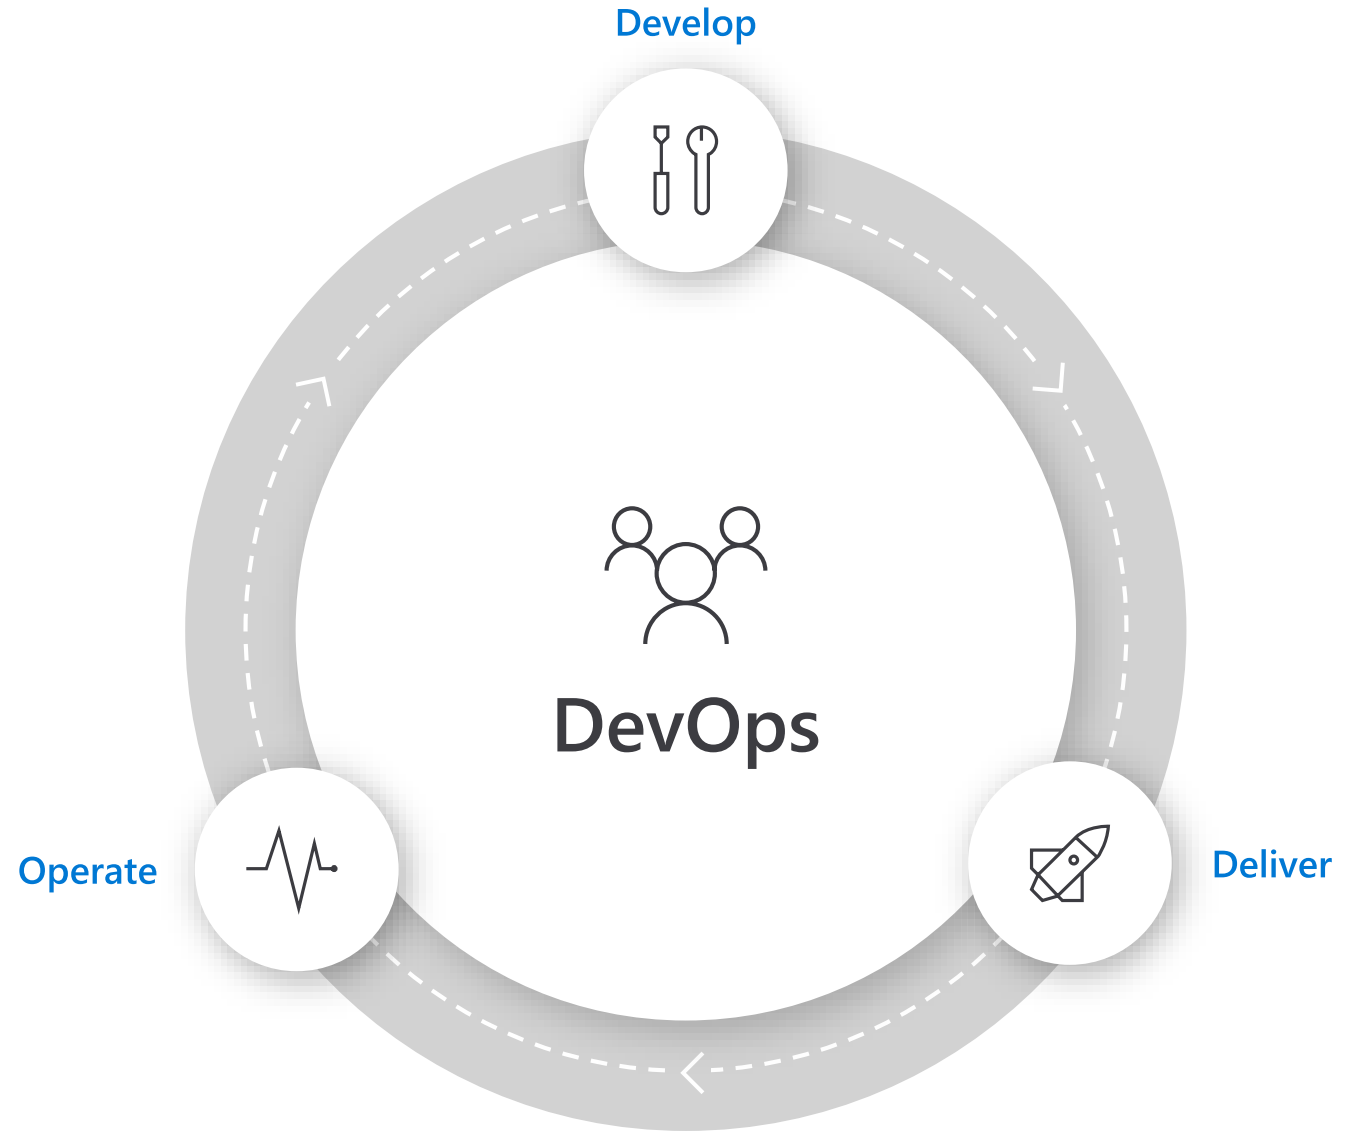

# Accelerating Delivery with DevOps

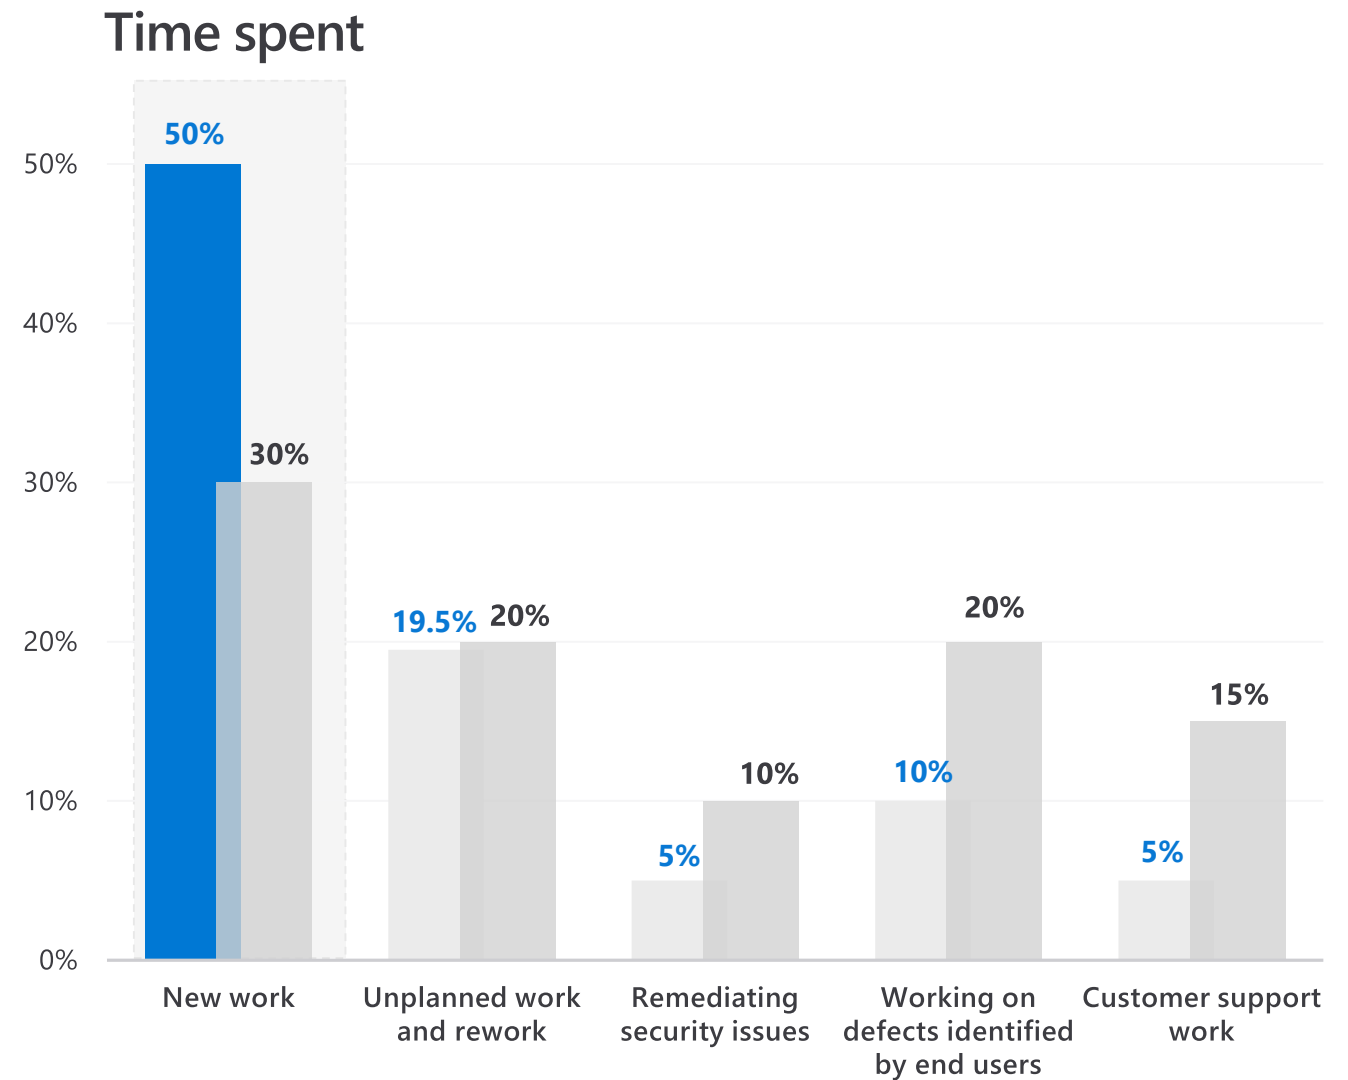

DevOps is the union of **people**, **process**, and **products** to enable continuous delivery of value to your end users.

# Innovation with oversight

Top performing DevOps companies spend more time innovating and less time “keeping the lights on”.

The result: better products, delivered faster, to happier customers by more engaged teams

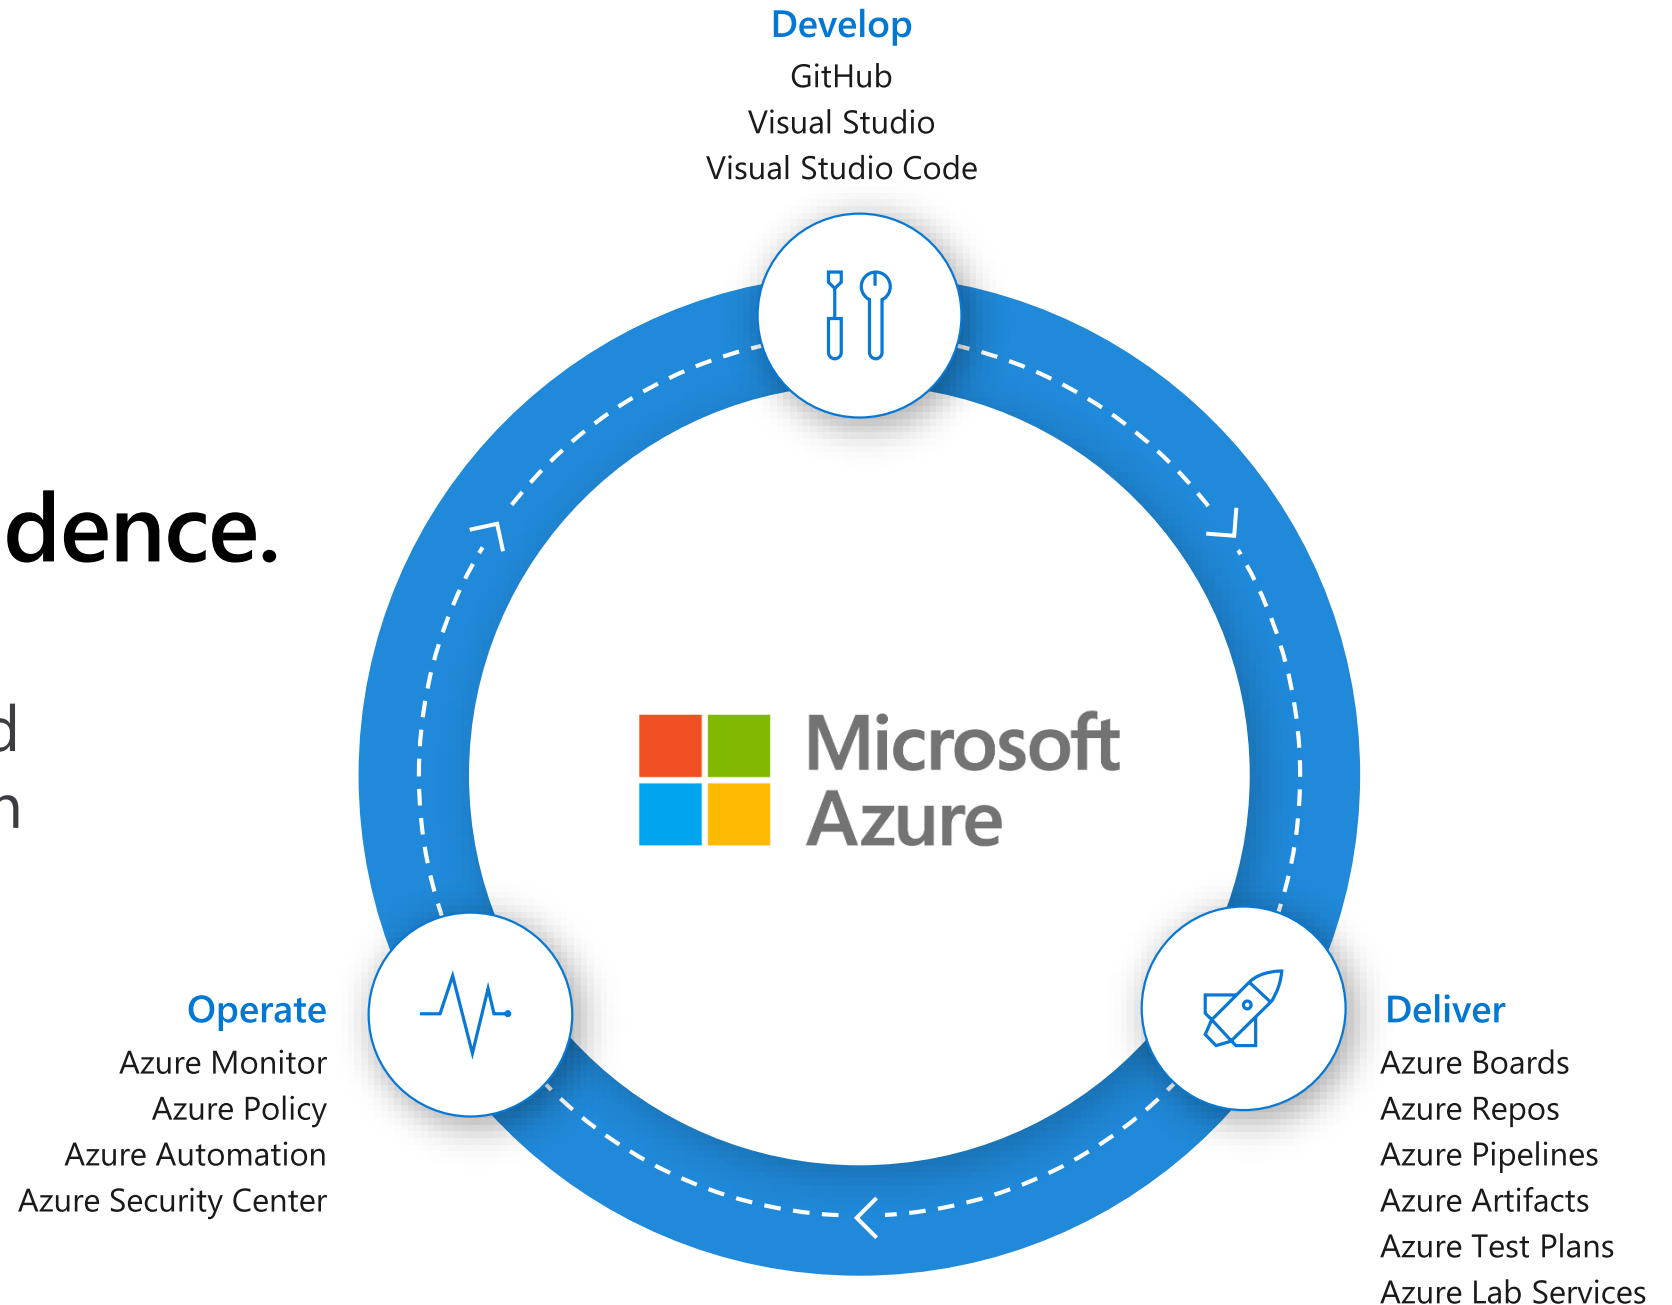

# Our Solution

# Innovate at scale. Deliver with confidence.

Microsoft Azure is the cloud  
with DevOps tooling built in

# Deliver with Azure DevOps

# GitHub

GitHub brings the **premier** social coding workflows to your team, breaking down silos and enabling Inner Source through:

- Expertise sharing
- Cross-team collaboration
- Improved code reuse
- Increased velocity

# The #1 developer community on the planet

Most contributions **1.1B in 2018**

Most developers **33M**

Most Repos **100M**

Most secure **5M vulnerability alerts in 2018**

Home to the most  
important and popular  
open source projects  
on the planet

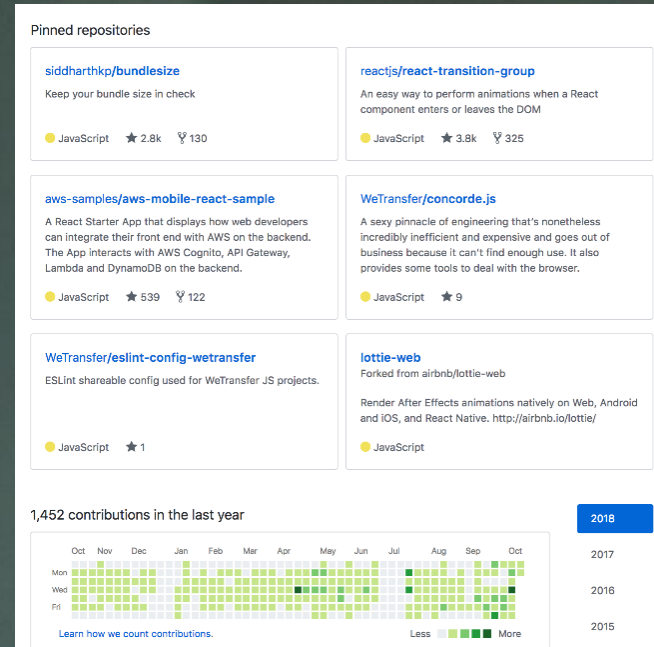

# Winning the war for talent

The world's leading companies use and contribute to open source software. It is also how they attract and retain talent

Developers want to:

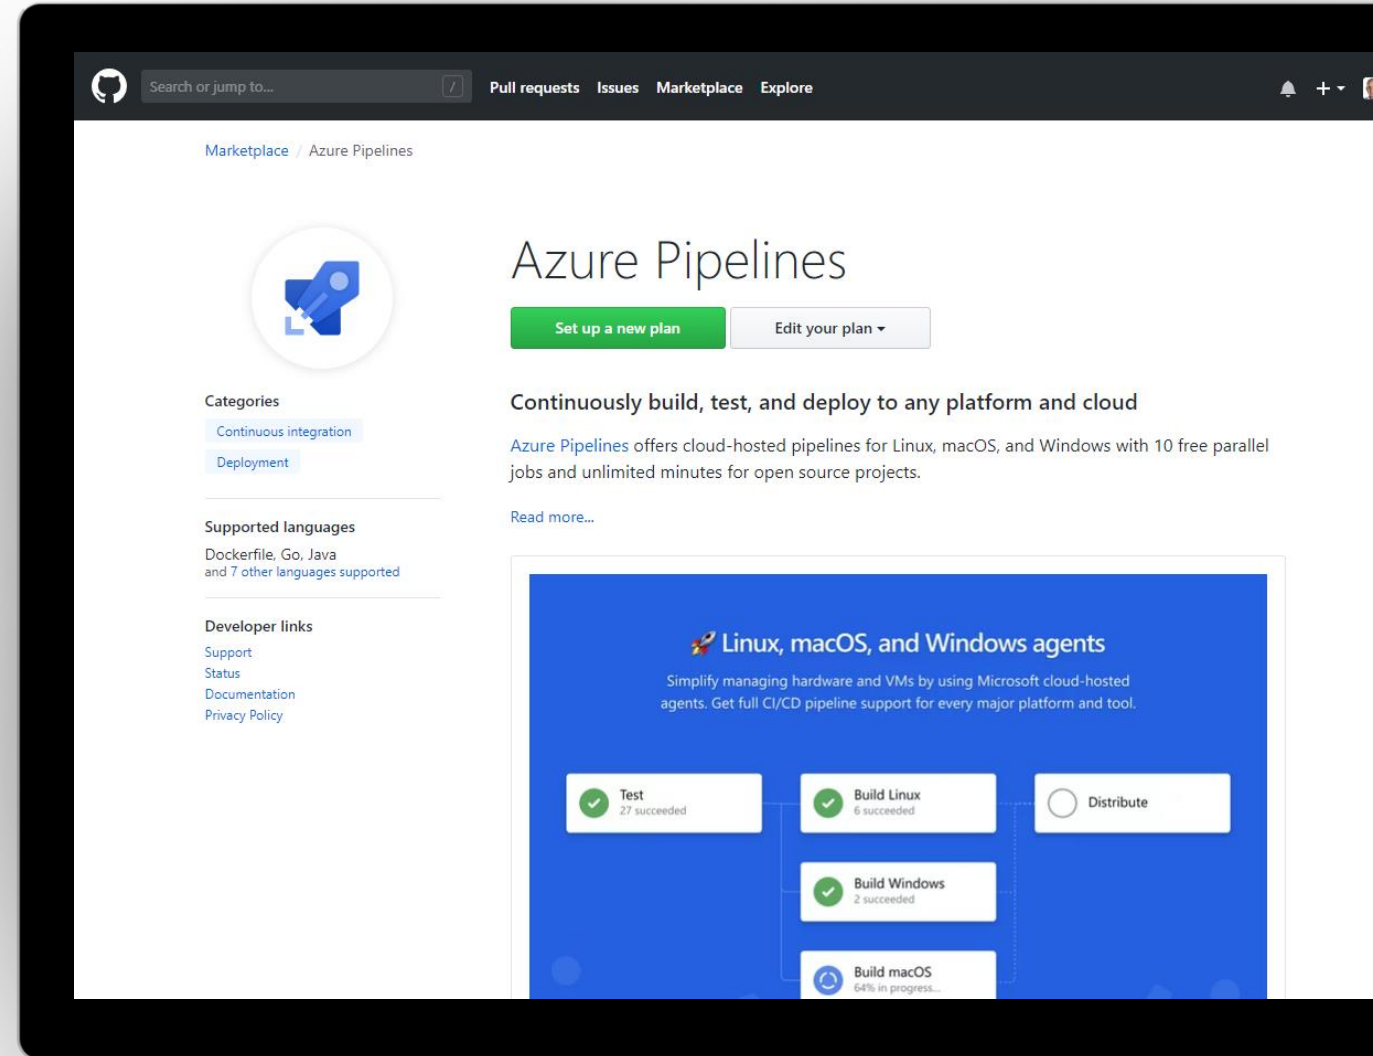

- Solve interesting problems
- Collaborate with other developers
- Grow their skills
- Use tools they love

# Azure DevOps Integrated with GitHub

Rich integration with Azure Pipelines  
and Azure Boards

# Azure Pipelines

Free **unlimited** build minutes for public projects

Up to 10 free parallel jobs across Windows, Linux and macOS

 <https://azure.com/pipelines>

Microsoft ❤️ Open Source

# Demo:

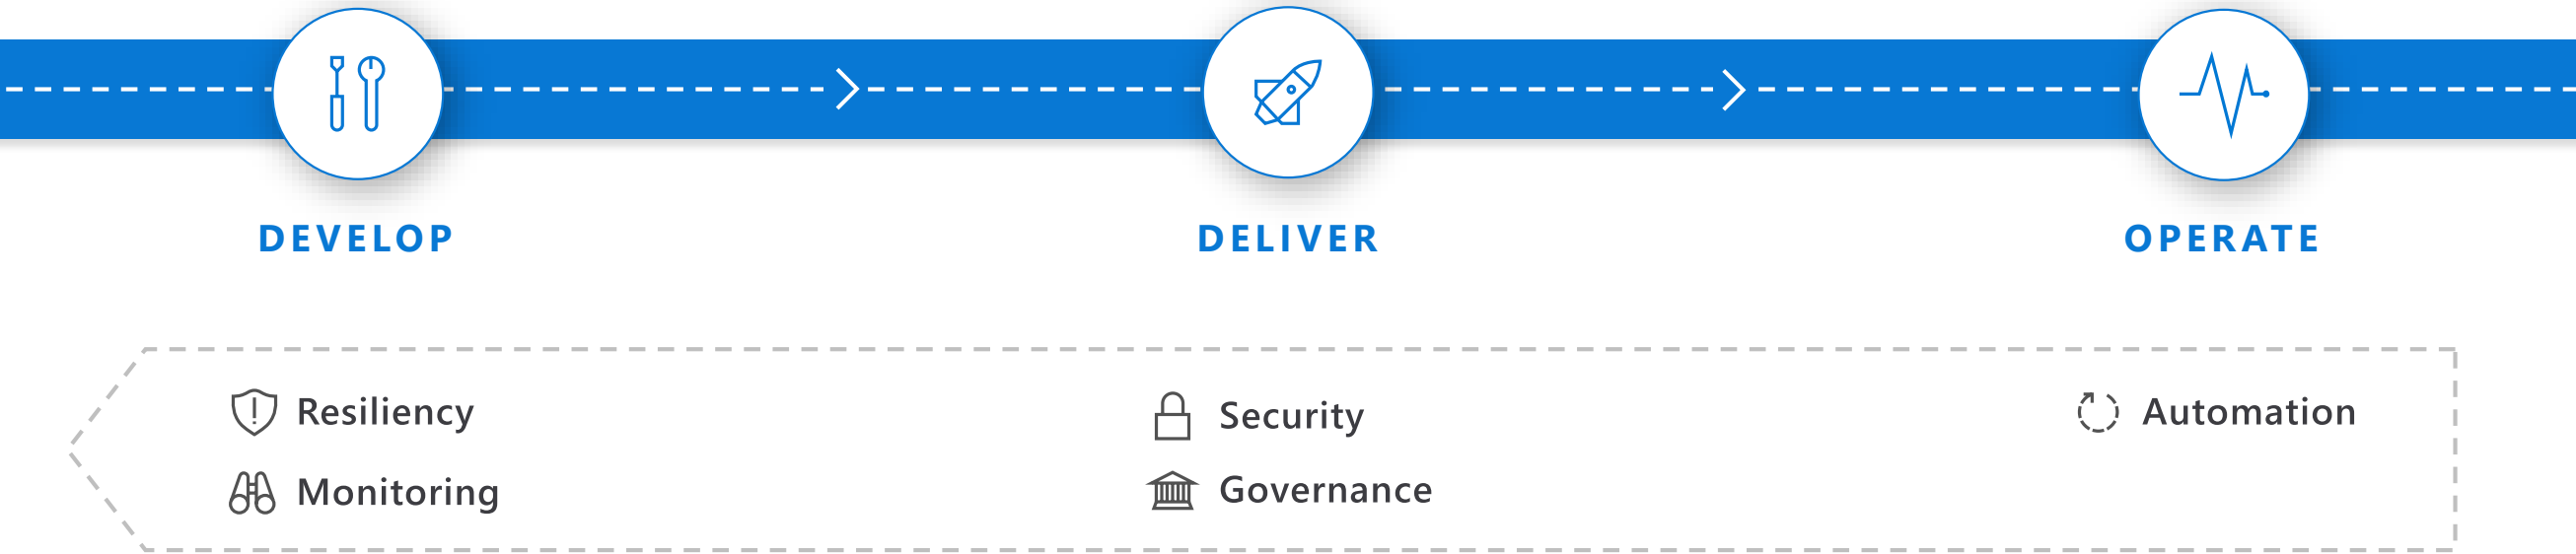

# Azure DevOps with GitHub

# Reactive operations

# Moving to proactive operations with Azure

"Shifting left"

# Deploy continuously and compliantly

Enterprise-grade security, monitoring, and management services built-in

## Governance

Proactively apply policies and enable compliant releases

---

Azure  
Policy & Blueprints

## Security

Industry leading Security with Advanced Threat Protection

---

Azure  
Security Center

## Resiliency

High availability and protection for VMs, apps and data

---

Azure  
Backup & Site Recovery

## Monitoring

Deep operational insights with rich intelligence

---

Azure  
Monitor

## Automate

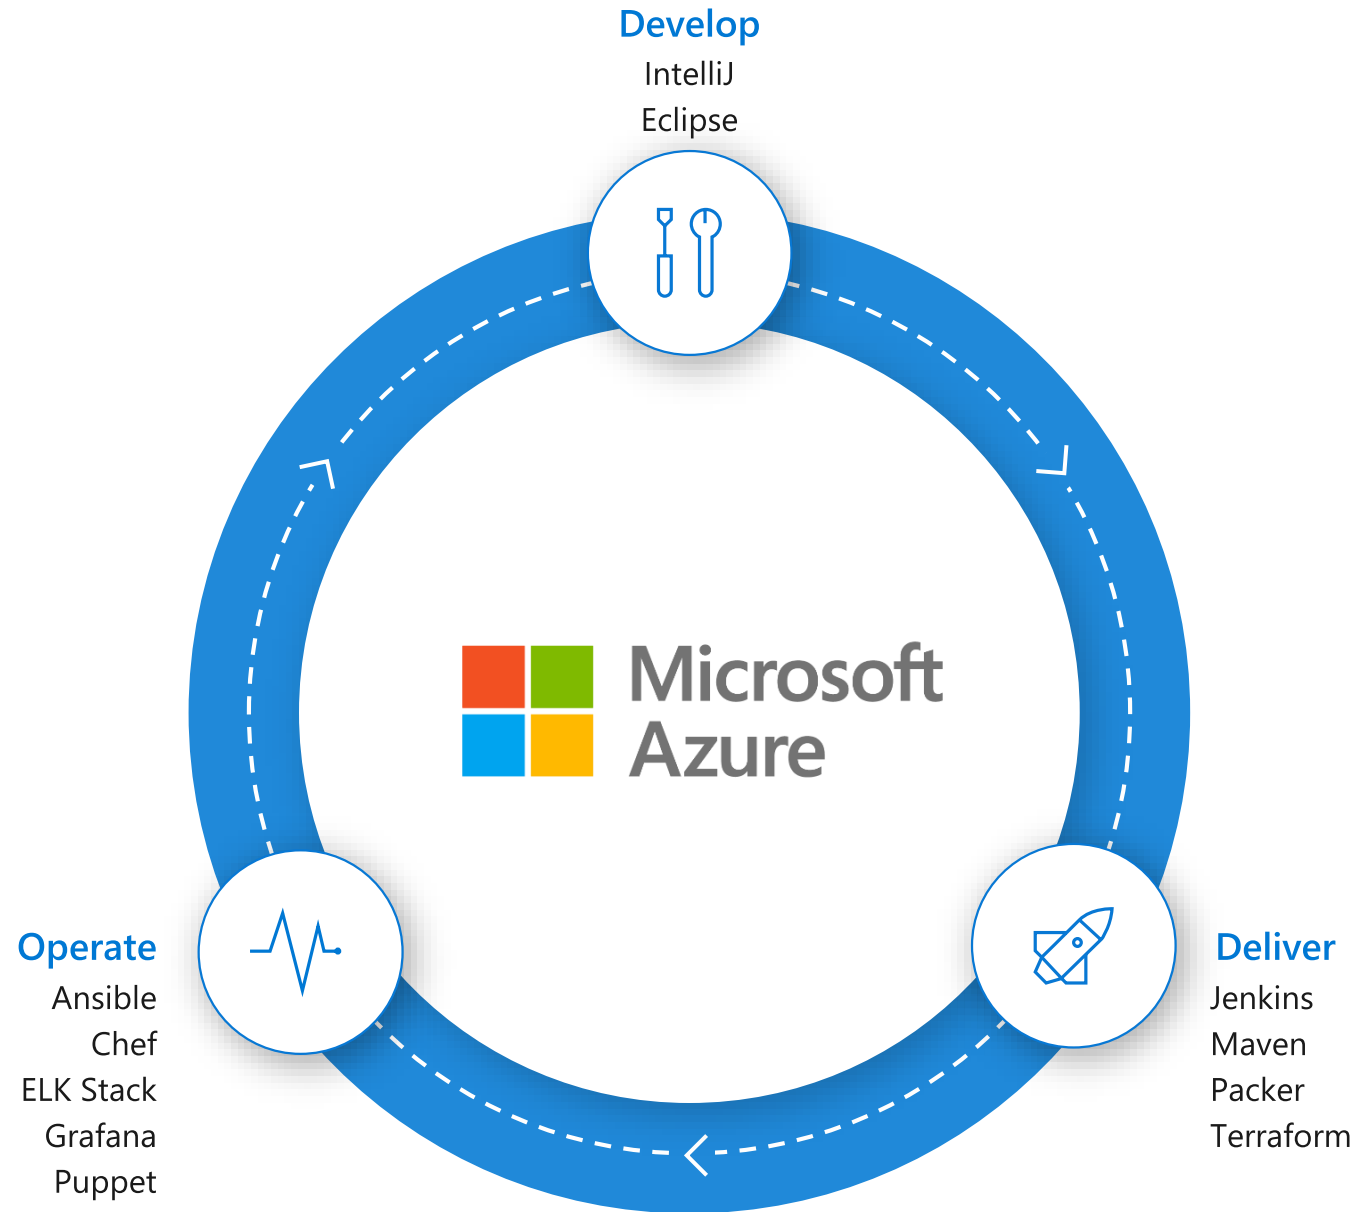

Powerful scripting, configuration and update management

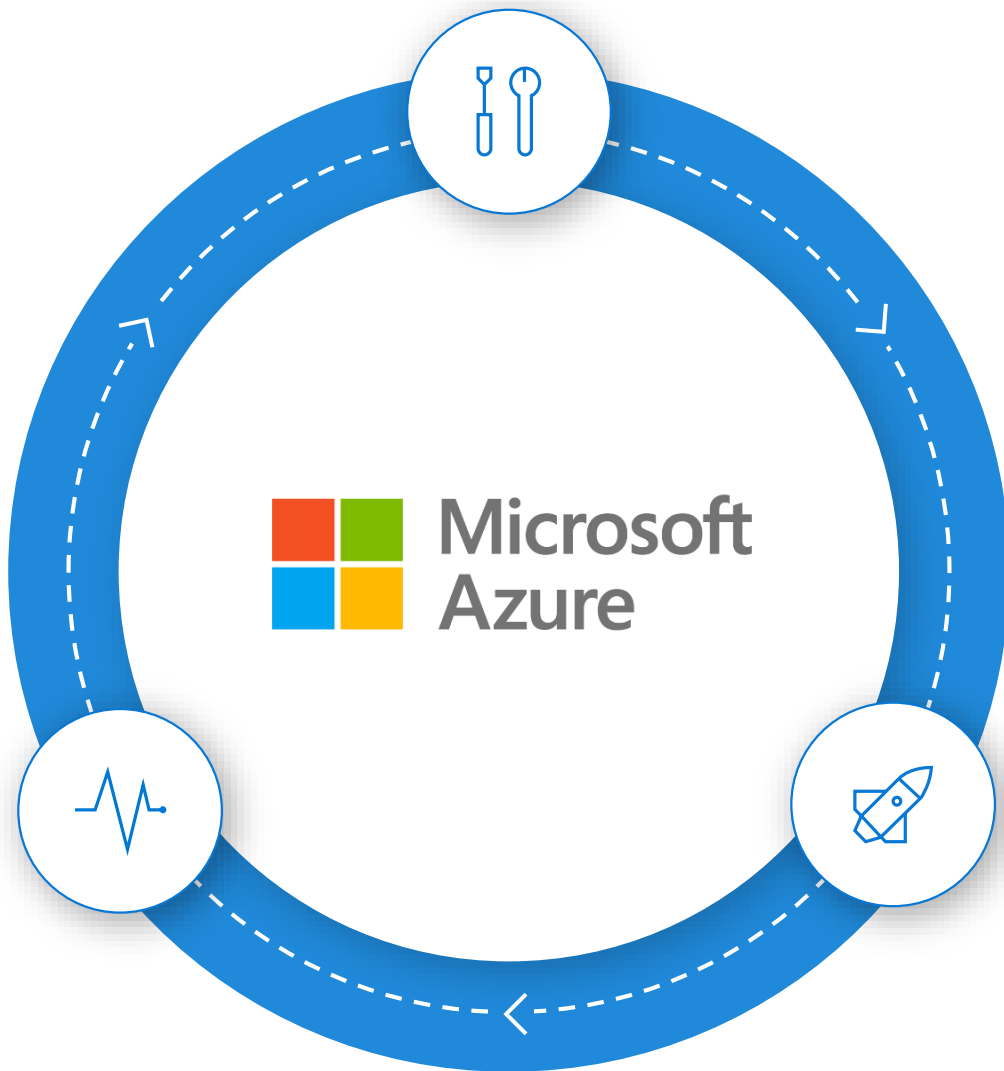

---

Azure  
Automation

# Use the tools you know and love

Azure and GitHub are fully integrated with your existing tools and workflow

### Core Infrastructure

Compute  
Security  
Storage  
Management  
Networking

### Advanced Workloads

Web + Mobile  
Internet of Things  
Microservices  
Containers  
Serverless  
Identity  
Data + Analytics  
Artificial Intelligence  
Cognitive Services  
High Performance Computing

### Azure Stack + Hybrid

The cloud with DevOps tools built in

# Azure DevOps

- Continued heavy investment in Azure DevOps
- Best in class CI/CD solution across the industry
- Best & most loved solution for managing development teams
- Tight integrations with GitHub
- Provide enterprise scalable package management

<https://azure.com/devops>

# Azure DevOps supports small teams and the largest enterprises

“ Instead of telling people to wait for 6 months for a new feature, we can give it to them in a few weeks...Our 2800 worldwide developers can use the same backlog, user stories and tests whether they're on Windows or Linux... building for iOS or Android. ”

“ Microsoft made it really easy to break outside the silos... and tie the DevOps process into the fulfilment of business process. Without the tools that we have today, we would not be successful. ”

“ Speed is gained in moving to the PaaS offering of Azure DevOps. PaaS provides regularly released features and a future-proof capability, eliminating the need for Accenture to maintain infrastructure and go through upgrade cycles. ”

“ Branches sync 500 percent faster. Builds are 400 percent faster, with the typically six-hour process reduced to 90 minutes. We (now have) a highly streamlined process that operates with a few button clicks—and one-button deployment. ”

# DevOps at Microsoft

Azure DevOps is the toolchain of choice for Microsoft engineering with over 100,000 internal users

 <https://aka.ms/DevOpsAtMicrosoft>

442k

Pull Requests per  
month

4.6m

Builds per month

28k

Work items  
created per day

2.4m

Private Git commits per  
month

3.5k

Open Source repos

12k

Employees contributing  
to open source

82,000

Deployments per day

# Global Reach

Azure DevOps has more global regions than any other cloud provider

# Migrating from On-Prem to the Cloud

Move from Team Foundation Server to Azure DevOps and bring your data along

## Benefits of Cloud Hosted Azure DevOps Services

- Global availability
- Hosted and maintained by Microsoft with 99.9% uptime guarantee and 24x7 support
- Immediate access to latest features
- Simplified deployment to Azure

## Azure DevOps Import Service

- Fully supported high fidelity migration path
- Trusted by many large enterprises
- Now faster and easier to use

# Azure DevOps Services Pricing

## Open Source Projects

### Free

Unlimited users and build time

- **Azure Pipelines:** 10 parallel jobs with unlimited minutes for CI/CD
- **Azure Boards:** Work item tracking and Kanban boards
- **Azure Repos:** Unlimited public Git repos

## Small Teams

### Free

Start free with up to 5 users

- **Azure Pipelines:** Run 1 Microsoft-hosted job for 1,800 minutes per month and 1 self-hosted job for any amount of time
- **Azure Boards:** Work item tracking and Kanban boards
- **Azure Repos:** Unlimited public Git repos
- **Azure Artifacts:** package management
- Unlimited stakeholders

## Teams of any size

### Starts at \$6

per user, per month for Boards & Repos\*

Easy pricing that grows with your team

- **Azure Pipelines:** Run 1 Microsoft-hosted job for 1,800 minutes per month and 1 self-hosted job for any amount of time
- **Azure Boards:** Work item tracking and Kanban boards
- **Azure Repos:** Unlimited public Git repos
- **Azure Artifacts:** package management
- Unlimited stakeholders
- Boards & Repos included for Visual Studio subscribers

<https://azure.com/pricing/details/devops/>

\* 5 Boards & Repos users and 5 Artifacts users free. Pipelines with unlimited minutes, Test Plans users and additional Artifacts users also available. Please see the Azure pricing calculator for details.
